

RAVENOL LGC Hot Climate -15°C Protect C13

ART.-NR. 1410130

1,5 L | 1410130-150
5 L | 1410130-005
10 L | 1410130-010
20 L | 1410130-020

APPROVALS VW TL 774-J (FÜR KONZENTRAT)

RECOMMENDATIONS VOLKSWAGEN VW G013A8JM1, G013A8JM8, G013A8JM9 | AUDI, SKODA & SEAT

RAVENOL LGC Hot Climate -15°C Protect C13 is a ready to use, prediluted with water, eco-friendly 1.2- Ethanediol (monoethylene glycol) based coolant with glycerine additive for cooling circuits in combustion engines which provides maintenance-free corrosion and frost protection. This product is formulated based on a proven inhibitor development by combining glycerine and silicates with the organic additive technology OAT as an extended life coolant.

The quality of an antifreeze is no longer just determined by the antifreeze effect (which automatically exists in an ethylene-glycol based product), but by the rust protection.

That is why automakers subject antifreeze to lengthy corrosion and cavitation tests.

RAVENOL LGC Hot Climate -15°C Protect C13 protects the cooling system from rust, frost, and in summer, from overheating.

Application Notes

RAVENOL LGC Hot Climate -15°C Protect C13 is a prediluted coolant with frost and rust protection for year-round use in automotive engines.

Even in summer coolant must contain enough antifreeze to ensure good corrosion and overheating protection.

Instructions: Add **RAVENOL LGC Hot Climate -15°C Protect C13** to radiator to fill line.

Characteristics

RAVENOL LGC Hot Climate -15°C Protect C13 offers:

- Excellent for all-aluminium engines
- Good reserve alkalinity
- Premium corrosion additives for optimal rust protection for all metals and metal alloys used in cooling systems, including aluminium
- Prevents sediments and foaming in the cooling system
- Compatible with elastomers used in automotive radiators
- Can be mixed with other coolant types

Property	Unit	Data	Audit
Density at 20°C	kg/m ³	1050	EN ISO 12185
Colour		violett / lila	visual
pH- value		7,8	ASTM D 1287
Freezing point	°C	-15	ASTM D 1177
