

RAVENOL Professional Radiator Stop Leak

ART.-NR. 1390301

300 ml | 1390301-300

RECOMMENDATIONS NEUTRAL GEGEN GUMMI, KUNSTSTOFFE, LEICHT- UND BUNTMETALLE | VOLL VERTRÄGLICH MIT FROSTSCHUTZMITTELN UND KÜHLFLÜSSIGKEITEN

Sealant for the cooling system.

RAVENOL Professional Radiator Stop Leak is a dispersion for protecting the cooling system and the combustion chamber against leaks and increasing operational safety.

RAVENOL Professional Radiator Stop Leak permanently seals hairline cracks and leaks.

RAVENOL Professional Radiator Stop Leak prevents seals from sweating and the loss of coolant.

RAVENOL Professional Radiator Stop Leak is suitable for closed cooling systems.

Application Notes

RAVENOL Professional Radiator Stop Leak is added to the radiator. If there are filters in the cooling system, a radiator jointing material may not be used.

Area of application:

- Severe sweating of cylinder head gaskets
- Leaky hose connections
- Hairline cracks in the radiator, cylinder head or engine block

Application: **RAVENOL Professional Radiator Stop Leak** suffices for 10 l of coolant. Open the heating valve completely. The engine should be at operating temperature.

Shake the can and fill the content into the cooling system with the engine running. Add coolant.

After filling, allow the engine to continue to run for at least 10 min. or take a test drive. Check the system's coolant level, absence of air and leak tightness.

For lorry radiators mix ratio max. 1:100.

RAVENOL Professional Radiator Stop Leak is also suitable for closed cooling systems.

Characteristics

RAVENOL Professional Radiator Stop Leak provides:

- Protection against sweating cylinder head gaskets
- Sealing of hairline cracks and leaks in the cooling system
