The engine oil is frozen.

Engine oil is frozen and doesn’t lube the engine well, insufficient lubrication will cause damage of the engine and its non-lubricated components.

RAVENOL expert

How do I choose the correct engine oil?

Some engine oils only meet the minimum requirements according to the manufacturer’s specifications. RAVENOL exceeds those norms and standards!

Based on analyses taken in the German laboratories ISP and Oelcheck. Valid for engine oil reference 08880-11005 SAE 0W-16, Batch No. 20013M16AO and for engine oil RAVENOL reference 1111103 SAE 0W-16.
