Application: Passenger car

RAVENOL OTC COLD CLIMATE -60°C is a ready-to-use, prediluted with water, eco-friendly 1.2- Ethanediol (monoethylene glycol) based silicate, borate, nitrite and phosphate-free coolant for cooling circuits in combustion engines which provides maintenance-free corrosion and frost protection. This product is formulated to be used in cold climate regions, based on a proven inhibitor development with the organic additive technology OAT as an extended life coolant.

The quality of an antifreeze is no longer just determined by the antifreeze effect (which automatically exists in an ethylene-glycol based product), but by the rust protection. That is why automakers subject antifreeze to lengthy corrosion and cavitation tests.

RAVENOL OTC COLD CLIMATE -60°C protects the cooling system from rust, frost, and in summer, from overheating.

Application Note

RAVENOL OTC COLD CLIMATE -60°C is a prediluted coolant with frost and rust protection for year-round use in automotive engines, especially for use in cold climate regions.

Even in summer coolant must contain enough antifreeze to ensure good corrosion and overheating protection.

Instructions: Add RAVENOL OTC COLD CLIMATE -60°C to radiator to fill line.

RAVENOL OTC COLD CLIMATE -60°C can also be used according the mixing table. Mix **RAVENOL OTC COLD CLIMATE -60°C** with distilled water (per mixing chart) and add. Allow engine and heater to warm up, add coolant to fill level.

Characteristics

- Excellent for light metal engines
- Good reserve alkalinity
- Premium corrosion additives for optimal rust protection for all metals and metal alloys used in coolingsystems, including aluminium
- Prevents sediments and foaming in the cooling system
- · Compatible with elastomers used in automotive radiators
- Can be mixed with other coolant types
